

# Barn Find Mercedes-Benz Sale

**1967 300SEL.** From a collection of ten 1950s to 1980s Mercedes-Benz cars, parked up years ago and now in need of new homes. All cars require work, spanning easy reconditioning to full restorations. Mostly complete, some with spare parts included, all with a layer of dust...

Chassis No: WDB10901522001296

This 1967 car is an especially rare model. Only produced for a period of 3 years, just 37 examples were manufactured in 1967, within a total of 2519 300SELS.

Of these 37 cars only a fraction were right-hand-drive, so this car would be one of a handful of survivors. Only one other example is known in WA.

The long wheelbase helped make the fuel injected 300SEL quite the luxury car. Air conditioning, power steering, power windows, leather seats and air suspension were standard on this model.

The early history of this red car is unknown. It has covered 127,000 miles, believed to be true. The car has been in the owner's collection for over a decade.

The owner advises that the car appears to be sound and that there is very little evidence of rust. A section of rust in the spare wheel well has been repaired. All panels open and shut nicely.

All the trim parts appear to be with the car and it hasn't been disassembled. A spare tail-light lens to replace a broken one on the car will be supplied with it.

The interior upholstery will need renewing. The owner advises that the RHF suspension airbag needs replacing and the fuel pump needs cleaning/rebuilding so the car will run. He used to run it regularly but not for the past few years.

This is a very rare model and a unique opportunity.

Indicative price: \$9,000.00

The above description is provided for promotional purposes only. The seller does not guarantee the above information's authenticity and/or accuracy. Prospective buyers are to inform and satisfy themselves as to the condition of the vehicles and any associated defects therein.
